**Services Industry Coalitions in Australia and Chile welcome the conclusion of a bilateral Free Trade Agreement between their two countries**

The Australian Services Roundtable and the Chilean Coalition of Services Exporters together welcomed the announcement today that a Free Trade Agreement had been concluded.

Importantly the Agreement contains strong WTO-plus outcomes on Services and Investment which both organizations consider should serve to support growing bilateral trade and investment flows and closer business ties into the long term.

The two organisations look forward to working even more closely together on global trade and investment issues.
